Fixed Line Number Porting process documents	OTA2	Full suite of Industry process documents - Geo & Non-Geo porting.	01/04/2014	Various	OTA2 website - Best Practice Guide
WLR3 Repair 'Ineffectives' Best Practice Guide	Openreach	It is imperative that prior to raising a fault with Openreach, that robust checks are carried out in order to ensure an effective and speedy resolution for your customer. These checks will help determine the cause of the problem and the correct route/method needed to resolve it, be that with you, your customer or Openreach. If a fault is dispatched and the issue is found on non Openreach maintained equipment or no Openreach issue is found then a visit charge will be raised to the Communications Provider (CP). This guide has been designed to help CPs minimise these charges by helping advisors diagnose end user issues correctly and when a fault is raised with Openreach, ensure the advisor selects the appropriate Structured Question Report Code (SQC) dependant on the End Users fault condition. Best Practice Diagnosis should eliminate all other possibilities - prior to testing for a network fault	29/04/2014	Iss 1	OTA2 website - Best Practice Guide
